

# Chapelgreen Practice

## Productive General Practice

**We want to be part of the best GP practices in Sheffield providing a quality and caring service to all our patients.**

To this end the practice is about to embark on an exciting new project called **The Productive General Practice**. Its aims are threefold:

1. To improve patient experience
2. To maximise staff wellbeing and learning
3. To increase value and efficiency

We will be gathering a large amount of data about the practice and our patients. This will then be analysed and the first area of operation that we are going to investigate is our front of house – Reception area and Patient Experience which causes so much frustration for both patients and staff.

We have a **Patient Group** looking after your interests. If you wish to be part of this please speak to any member of the Team, or contact Christine Debruyne  
seedybrainacdb@gmail.com

**We need to know what you think.**
